

Portable Assisted Study Sequence Economics

SCOPE

In this one-semester course, students will learn the major economic concepts and theories covering how people use scarce resources like time, land, or money, to meet their needs or wants. Economics is not just about money – it is about scarcity, opportunity, and making decisions. Students will gain valuable knowledge about business, government, finance, and the world economy. Students will also have opportunities to apply this knowledge in practical ways by developing a budget, applying for a job, using a bank account, etc. Activities will help students to analyze choices and improve their decision-making skills to become better problem-solvers by examining complex economic problems and considering a variety of possible solutions. In addition, career opportunities in fields related to economics are discussed and explored.

SEQUENCE
